FLOOD PLAIN CONDITIONS IN CHINA

This memorandum is in answer to a request from D/GG for assistance in locating and procuring aerial photography covering flood control projects and flood plain conditions in selected areas along the Yangtse, Huang, and Huai Rivers in China.

With the cooperation and assistance of GCD/GR, a search was made of Navy and Air Force photographic files and the following photographs were procured, plotted, and delivered to the requester. These photographs were to be used by the requester to revise and enlarge CIA/RR III-399, entitled Effect Of The 1954 Floods On Agriculture In Communist China.

SOUTHEAST CHINA TRANSPORTATION STUDY

25X1A This memorandum reports the completion of a project requested by OCI concerning a photographic study of the major roads in Southeast China. This project, verbally suggested by [REDACTED] was formalized in a letter dated 12 October 1954 from Chief, Requirements Branch, OCI to Chief, P.I. Division, ORR.

This letter gives details as to the specific roads that required study, and the types of information needed about these roads. All available Navy, Air Force, and CNAF oblique and vertical photography was procured and studied. The results were reported in the form of acetate overlays over WAC 1:1,000,000 maps. The results in three critical areas were reported in the form of acetate overlays over 1:250,000 Approach Charts.

Ozalid transparencies of the original acetate drawings were prepared and delivered to the requester. The following distribution was made:

25X1A 2 ozalid transparencies and 1 paper ozalid copy was delivered to [REDACTED] for OCI use. One of these copies was transmitted to G-2 by OCI.

1 set of transparencies was delivered to ORR/S/TR via [REDACTED]

25X1A This project was completed on a "Crash" basis so that it would be completed in time for use in U.I.E.

This project will be continued under a new number and as new photography arrives in Washington, it will be studied and information on the supply routes kept up-to-date and reported periodically to OCI.
